Health Conditions

Your spine is the foundation of health and core strength in your body. Shifts in the vertebrae or sections of the spine will spread ultimately causing weakness and distortion to ALL the areas of the spine. These distortions are reflected in abnormal posture. Research shows abnormal posture leads to chronic pain, disease and possibly a shortened life span.¹ Please answer the following questions accurately so we may determine the full extent of your condition.

CERVICAL SPINE (NECK)

Misalignment of the individual vertebrae or distortion of the complete cervical curve (neck) originating in the neck or a compensation from postural distortions in other areas of the spine may result in many health conditions. Have you experienced any of these symptoms presently or in the past? **If pain is NOW, please CIRCLE the % frequency, and the number severity.**

Please indicate: (N) = Now, (P) = Past, next to all conditions you've experienced or both if applicable.

INFORMED CONSENT TO CHIROPRACTIC CARE

I hereby request and consent to the performance of Chiropractic Adjustments (SMT) and other procedures, including various modes of manual therapy, physical therapy, therapeutic stretching, electrotherapies, active exercises, spinal traction, intervertebral disc decompression and diagnostic x-rays, by Ex-Static Chiropractic and /or their personnel. I further understand and am informed that, as in all health care, results are not guaranteed, there is no promise to cure. There are **very slight risks** to chiropractic, including, but not limited to the following:

- ~Aggravating and / or temporary increases in pain symptoms or muscle spasms
- ~Rare cases of rib fractures, muscle and ligament sprains or strains following manual adjustments.
- ~There have been reported cases of injury to a vertebral artery following cervical spinal adjustments. These artery injuries are associated with stroke, sometimes with neurological impairment and may on rare occasion result in serious injury. The possibility of such injuries resulting from cervical spinal adjustment is extremely remote, and have been found to be an equal risk with medical care. (1-6)
- ~There have been rare reported cases of disc injuries following cervical and lumbar spinal adjustment.

Chiropractic treatment, including SMT, have been the subject of government reports and multi-disciplinary studies conducted over many years and has been demonstrated to be highly effective and safe treatment for musculoskeletal pain. I acknowledge that I have discussed, or have had the opportunity to discuss, the nature and purpose of Chiropractic treatment in general and my treatment in particular, as well as the contents of this Consent Form.

I do not expect my doctor(s) to be able to anticipate and explain every risk or complication and I wish to rely on my doctor(s) to exercise professional judgment during the course of the procedure which the doctor feels as the time, based upon the facts then known, and is in my best interest.

Our clinic operates an Open Rehab Bay. Therefore there will be times where your treatment program may have you in contact with other patients. If there is ever a time where you wish to speak with your doctor in private, we will always accommodate your request. Rest assured, your patient information will always remain confidential.

This consent applies to all my present & future care with Ex-Static Chiropractic.
